Shaswot Gautam

Software Developer — Web · Android · Games

mrgautam2026@gmail.com · github.com/mrshasxx1 · LinkedIn

SUMMARY

Self-taught developer and Harvard CS50x / CS50P / CS50W graduate. I design, build and ship complete products end-to-end — seven live web apps so far, spanning AI video processing, real-time chat, developer tooling, private file conversion and freelance invoicing. Comfortable across the stack: Python, JavaScript, C, Java, SQL.

PROJECTS — ALL LIVE IN PRODUCTION

Clip Kitchen — AI video reformatting

Flask · Render · 2026

Built an AI-powered tool that reformats one video upload for YouTube, TikTok, Instagram Reels and LinkedIn with correct aspect ratios, replacing five manual re-exports with one click. clip-kitchen.onrender.com

ChatBlinker — real-time chat platform

Node.js · WebSockets · Render

Built and operate a chat platform with public topic rooms, one-on-one random chat and private DMs. No signup required — guests get a name and join instantly. chatblinker.onrender.com

MegaCalc — calculator suite

Vanilla JS · Canvas · Vercel

Designed a keyboard-first calculator suite: standard and scientific modes, unit converter, live function graphing, running history, and settings that persist locally. mega-calculator-zeta.vercel.app

LocalForge — private file conversion

Vanilla JS · FFmpeg WASM · Vercel · 2026

Built a browser-only file workbench — images, PDFs, audio and video converted, compressed and merged in the tab with no backend, so files are never uploaded anywhere. local-forge-nine.vercel.app

LanceFlow — freelance time tracker

Flask · SQLite · Vercel

Built a full-stack time tracker with clients, a reload-proof stopwatch, and one-click PDF invoice export. Built it because I needed it; other freelancers use it now too. lance-flow-rho.vercel.app

creatorOS — creator workspace

React · Vercel · 2025

Took a creator toolkit from sketch to deployed product — notes, ideas and planning in one workspace. creatoros-ten-kappa.vercel.app

EDUCATION

Harvard University — CS50 series

Completed

- **CS50W** — Web Programming with Python & JavaScript
- **CS50P** — Introduction to Programming with Python
- **CS50x** — Introduction to Computer Science

Currently learning: TypeScript, Next.js, Docker.
